SUMMARY

Senior Full Stack Engineer with **8 years of experience** building scalable, **high-performance web applications**. Proficient in **React, Node.js, TypeScript, Express.js, MongoDB**, and **microservices** architecture, with a strong focus on developing **maintainable, efficient, and reliable** software solutions.

EXPERIENCE

Senior Full Stack Engineer, Hireplicity

03/2024 – 05/2026
Los Angeles, CA(Remote)

- Developed and structured features to meet **client requirements**, increasing **user satisfaction** and **retention**.
- Improved the performance of several projects by analyzing the codebase, identifying areas for **optimization**, and **implementing** targeted solutions.
- Demonstrated strong leadership skills by **collaborating** with team members to solve **complex problems** and taking on additional responsibilities to ensure project success.
- Created and maintained workflows to implement new features and update the old ones with an organized and structured code.
- Reduced website loading time by **20%** by applying best practices in code **conventions** and **optimization** techniques, resulting in decreased bounce rates and increased user engagement.
- Created and maintained workflows using industry-standard tools to implement new features and update existing ones with an organized and **structured codebase, improving maintainability and scalability**.
- Adapted quickly to each client's specific needs, delivering projects that met and exceeded their expectations.

Full Stack Developer, LANEX Corporation

02/2021 – 03/2024
San Francisco, CA (Remote)

- Achieved a faster and more efficient service by designing and implementing a microservices architecture to reduce the amount of data received and request-response time.
- Developed a conferencing system using BigBlueButton on the back-end and server side, effectively handling the conference feature required by the platform and improving user engagement.
- Created a tracking system that monitored working time and took screenshots regularly, using efficient algorithms to ensure optimal system performance.
- Enhanced the functionality and user experience by implementing an online editor to create and edit documents in the platform by forking directly into a library and analyzing and modifying it to customize the behavior.
- Delivered robust, high-performing solutions by leveraging a tech stack that includes React, Node.js, Express.js, and TypeScript.

Web developer, Arcanys

08/2017 – 01/2021
Cebu, Philippines (Remote)

- Adapted the back end to switch from MySQL to MongoDB, enhancing the scalability and performance of the database system better to handle the increasing volume of user data and transactions.
- Designed and implemented a robust user authentication system, ensuring secure access and protecting sensitive user information.
- Developed a seamless payment processing system, integrating various payment gateways to facilitate smooth and secure transactions.
- Implemented a comprehensive order tracking feature, enabling users to monitor their orders in real-time, improving customer satisfaction and engagement.
- Ensured the platform was fully responsive and mobile-friendly, providing an optimal user experience across different devices and screen sizes.
- Delivered a scalable architecture that supported future expansion and growth, allowing the platform to adapt to increasing user demands and new feature integrations.

- Worked closely with cross-functional teams to design, develop, and deploy critical features, fostering a collaborative environment that contributed to the successful delivery of the project.

EDUCATION

Bachelor's of Computer Science,
Ateneo de Manila University

10/2013 – 08/2017

TECHNICAL SKILLS

Languages:

JavaScript (ES6+), TypeScript, Python, Java, C#, Go, PHP, SQL, HTML5, CSS3, Bash/Shell

Frontend:

React.js, Next.js, Vue.js, Angular, Redux Toolkit, React Query (TanStack Query), Zustand, Tailwind CSS, Material UI (MUI), Bootstrap, Chakra UI, SASS/SCSS, Vite, Webpack

Backend:

Node.js, Express.js, NestJS, FastAPI, Django, Flask, Spring Boot, ASP.NET Core, RESTful APIs, GraphQL, WebSockets, gRPC, Microservices, Serverless Architecture

Databases:

PostgreSQL, MySQL, Microsoft SQL Server, MongoDB, Redis, DynamoDB, Elasticsearch, Firebase Firestore

Cloud & Hosting:

AWS, Microsoft Azure, Google Cloud Platform (GCP), Vercel, Netlify

DevOps & Infrastructure:

Docker, Kubernetes, Terraform, GitHub Actions, GitLab CI/CD, Jenkins, Nginx, Linux, Helm, ArgoCD

Performance Optimization:

Lazy Loading, Code Splitting, Caching Strategies, CDN, Image Optimization, SSR, SSG, ISR, Database Indexing, Query Optimization

AI Integration:

OpenAI API, Anthropic Claude API, Google Gemini API, LangChain, LangGraph, LlamaIndex, Pinecone, Weaviate, pgvector, Retrieval-Augmented Generation (RAG), AI Agents, Model Context Protocol (MCP)
